Project manager (m/f/d)
International Cooperation for innovation

Job-ID: V000045680
Location: Eschborn, Bonn
Assignment period: 09/01/2021 - 12/31/2024
Field: Economic Development
Type of employment: full- or part-time
Application deadline: 07/22/2021

Job description

The International Sustainable Chemistry Collaborative Centre (ISC3) was set up by GIZ on behalf of the German Federal Ministry for the Environment and the German Federal Environment Agency to develop and promote Sustainable Chemistry solutions worldwide. The ISC3 promotes Sustainable Chemistry as a holistic approach for research and development as well as for the creation of marketable value that uses environmentally and socially sustainable standards. Delivered at scale, this approach will create new business and job opportunities and unleash the potential of chemistry towards the achievement of the United Nations Sustainable Development Goals across many sectors and value chains. ISC3 has established a Research & Education Hub at the Leuphana University of Lüneburg and an Innovation Hub at DECHEMA in Frankfurt.
Your tasks

- Coordinate the dialogue and cooperation with the ISC3 Innovation Hub operated by the DECHEMA eV in Frankfurt
- Ensure the quality of the innovation work packages, including financial and managerial aspects and their coherence with the overall ISC3 approach and impacts logic
- Collaborate with the ISC3 Innovation Hub to further develop the action field innovation, co-creating new activities and helping to generate more resources for a long-term support of Sustainable Chemistry and the ISC3 work
- Act as connecting point and door-opener to the knowledge of the GIZ
- Identify synergies and commonalities between the innovation, the research and education fields and the activities of GIZ
- Leverage these synergies and create added value to the action of ISC3 by proposing specific ideas for new projects or collaboration initiatives
- Support the ISC3 Director Science and Innovation to coordinate and strategically lead the work of the field Science and Innovation and the work of the hubs
- Manage selected projects or strategic partnerships in the fields of Science, Innovation and/or capacity development

Your profile

- University degree in Management, Business or Political Sciences or a comparable degree program
- Several years of professional experience in the field of international cooperation for innovation and private sector development in the international development cooperation
- Sound knowledge and professional experience in the areas of company formation, start-ups, acceleration/incubation and venture capital and in general in promotion and support programs for Micro, Small and Medium Enterprises and start-ups
- Knowledge and experience in the work of GIZ, its structures, processes, and ongoing programs is an asset
- Initial knowledge and interest in Sustainable and Green Chemistry, clean technologies, and circular/green economy
- Team player with an intercultural mindset, strong communicative skills, and a confident demeanour in a fast-paced working environment
- Knowledgeable and confident in agile and lean methods for collaboration as well as proficient in digital remote work and collaboration
- Fluent English and ideally German and Spanish skills

Notes
Die Stellenausschreibung richtet sich an alle Geschlechter.

Our benefits

Ensuring the compatibility of career, family work and care commitments is part of our corporate policy. Flexible working hours and comprehensive preparation packages for families accompanying staff abroad are two examples of the opportunities that GIZ offers its employees. Our family-friendly philosophy also includes providing support for family members in need of care. Everyone has the same opportunities in our company, regardless of gender, nationality, religion, sexual orientation or physical disability. We recruit based on specialist expertise and social skills. Transparency and fair opportunities for career advancement are just as much a matter of course for us as gender not being a barrier to taking up a management position. Your work will begin with an onboarding and preparation phase that will give you initial insights into GIZ and lay the groundwork for your upcoming assignment, establishing new contacts and building up your network.

Our health management helps staff all over the world to maintain their health and performance levels in a variety of ways. We provide opportunities for taking part in training and professional development to all our staff. Our Academy for International Cooperation (AIZ) will help you develop your skills. We are a provider of international cooperation services for sustainable development and work to build a future worth living around the world. We support projects in over 130 countries to achieve goals sustainably together with our partners. As sustainability and environmental awareness are part and parcel of our corporate philosophy, we will provide you with financial support in the form of a job ticket. Extensive check-ups and preventive measures (e.g. on appointment, before the outward journey, during the stay in a country of assignment, in an emergency) are provided to our staff and the family members accompanying them as a matter of course. We allow our staff to accrue working time credits in a long-term working time account. This credit can then be used to take a lengthy leave of absence. We offer you various part-time working models to give you flexibility in planning your working and home lives. Flexi-time and the possibility for mobile working gives staff maximum flexibility. We reward staff who achieve their agreed annual targets with a variable remuneration component. If your family is unable to go with you when you switch to another location, we will provide you with a separation allowance to help you cover the resulting extra costs. This will enable you to travel or to offset the costs of food or...
maintaining two households, for example.
